

ENCLOSURE

**If 150 is the decoupling ring, it must be here!**

The metallic fixing device 150, which acts axially on the intermediate body 140 and thus the pressure-measuring cell 120, is fixed in a releasable manner to or in the housing 110. The fixing device 150 is preferably a ring, as illustrated in FIG. 1. However, it may also be a disk which, like the ring,

According to the Examiner, this means that the sealing arrangement comprises first and second ring-shaped sealing elements and a decoupling ring (150)
